

2025-2026 School Year

Dear Parents, Guardians, and Staff,

In accordance with the requirements of the Asbestos Hazard Emergency Response Act (AHERA), this letter serves as our annual notification regarding asbestos management within our school building.

Federal law requires all schools to maintain an Asbestos Management Plan that documents the location and condition of any known or assumed asbestos-containing materials within the facility. The purpose of this plan is to ensure that any asbestos-containing materials present in the building are properly monitored and managed in a safe manner.

The most recent three-year AHERA reinspection of our facility was completed on **November 18, 2025**. This inspection confirmed that asbestos-containing materials within the building continue to be maintained in a safe condition and are monitored in accordance with federal regulations.

Our school's **Asbestos Management Plan is available for review at the school's main office during normal business hours**. If you would like to review the plan or have any questions regarding asbestos management at our facility, please contact the school office to arrange a time for review.

DCP Harper Woods remains committed to maintaining a safe and healthy learning environment for all students, staff, and visitors.

Sincerely,

Matthew Bowman
